To Whom It May Concern:

It is my pleasure to write this letter of recommendation for Paniccia Construction Corp. (PCC) in general and for Mr. Mario Paniccia in particular. As architects and engineers, we have knowledge and experience in the construction business and as such, we are hard customers to satisfy. Mario and his team have surpassed our expectations in their professionalism and their dedication to the task of completing the project on time and within budget.

Over the past four months Mario and his team of professionals have been working on our extremely challenging project of taking a historic Post Office building built in 1905 and converting it to a modern, state of the art office space.

The tasks which were successfully undertaken included heavy demolition of overhead structures, removal and proper disposal of contaminated flooring, installation of new HVAC system, reconstruction of the original windows, installation of new electrical and data systems, installation of fire and security system and renovation of the historical woodwork.

Throughout the construction, PCC effectively managed all the trades that were required to complete the project. PCC orchestrated their schedules to ensure that the project progressed smoothly and guaranteed that all the work was completed to PCC's high standards of excellence. As a result of their efforts, we were able to occupy our new office on time and are very satisfied with our new office.

I highly recommend Paniccia Construction Corp. and Mario Paniccia for your next project. Their experience, professionalism and dedication to the client will ensure the success of your project.

Sincerely

A handwritten signature in blue ink, appearing to read "D. Dagan", is written over a light blue horizontal line.
